

SSM 50096 - 2013-2016 F-Super Duty - 6.7L - Exhaust System Fluid Fault - Various DTCs

Some 2013-2016 F-Super Duty vehicles equipped with a 6.7L engine may exhibit an Exhaust System Fluid Fault message and a forced idle mode with various diagnostic trouble codes (DTC) stored in the powertrain control module (PCM). A video explaining how to remove the vehicle from forced idle mode has been added to the Technical Support Videos under the Technical Assistance tab on PTS. The video can be accessed using the following web link, <http://site-307934.bcvp0rtal.com/detail/videos/303---engine/video/6258842975001/2013-2016-f-super-duty-exhaust-fluid-fault-procedure>.
